

Norberto Muñoz Gómez

Tech
competence

Senior software engineer with 20+ years of experience in embedded software, verification and validation, CI/CD, Agile and requirements analysis. Selected experience covers C++, C, Jira, Git, Jenkins, Vector, Vector DaVinci, DaVinci. The CV emphasis is based on recent Volvo and Ericsson assignments, supported by foundational GE control-systems experience, with claims grounded in selected project evidence.

AVAILABILITY According to agreement

Programming

- C++
- C
- C#
- Bash
- Simulink
- Fortran
- Unix

Experience/Certifications

- ISO 26262
- AUTOSAR
- Vector DaVinci
- DaVinci
- Vector
- SIL
- HIL
- CI/CD
- unit testing
- verification and validation

Leadership

- Agile
- root-cause analysis
- collaboration
- onboarding
- coaching
- legal collaboration
- technical leadership

Experience

Mpya Sci & Tech / Volvo Group

Oct 2024 - Apr 2026

Senior Software Function Developer

Oct 2024 - Apr 2026

- Developed safety-critical, fail-operational embedded software for autonomous enabled trucks under strict real-time and reliability constraints.
- Coordinated cross-team initiative to apply AI-enabled automation to SIL and HIL testing.
- Worked according to ISO 26262 and V-model processes, contributing to requirements refinement, design, implementation, and UT/SIL verification.
- Implemented redundant control logic and fault-handling mechanisms to ensure robust system behavior based on health and sensor data.

Ericsson

Oct 2021 - Aug 2024

Software Engineer

Oct 2021 - Aug 2024

- Collaborated in Agile teams using C++, VS Code, Eclipse, Gerrit, Jira, and Jenkins.
- Executed end-to-end development including design, implementation, testing, and system integration.
- Performed automated unit testing and remote system smoke testing to verify service deployment, enablement, and operational readiness across distributed nodes.
- Developed and integrated software enabling automated setup and configuration of complex radio base station systems.

General Electric

Sep 2005 - Dec 2020

Technical Software Lead / Software Team Manager / Project Manager / Embedded Control Software Engineer

Sep 2005 - Dec 2020

- Performed validation activities including unit testing, software simulation, hardware-in-the-loop testing, and system performance analysis.
- Led technical development of embedded control software projects in agency-certified and regulated environments.
- Covered the full development lifecycle, from requirements and design to validation and customer deployment.

Education

Language skills

- English: native
- Spanish: native
- Swedish: excellent written and spoken

PhD and DEA in Advanced Automation and Robotics

Universidad Politécnica de Cataluña

2001 - 2007

- Thesis: Multistage scenario optimization procedure to plan annualized working hours with uncertainty factors.

BEng in Electronic engineering

Instituto Tecnológico de Celaya

1995 - 2006

- Thesis: Object oriented application to control home devices using the PC parallel port.

Additional courses/trainings/workshops

- Building Essential Leadership Skills (General Electric leadership program)
- Clear Leadership
- Interpersonal communication and leadership
- Deep Learning Specialization
- Data Science in Python
- Human Performance, Training and Nutrition (University of Queretaro)
- Radio Base Station Software Architecture Description
- C++
- Effective meetings
- XCODE/SWIFT programming
